	Today's work:	
	Roadblocks:	GitHub, Git repo
	Comments:	

DAY 4 - 03/09

Name	03/09
Jared Harman	
Jeff Janes	Finished most layout found and setup planetary API
GIT:JeffJanes2023	Fine tuning CSS bit of coding for the intering facts section
Email: jeff308	Flex (CSS) is a bit new and need to figure out implmentation
Nicholas Kroeger	Implemented wireframe, general design of homepage
github.com/NRKroeger	Complete home page, work on api implementation, make alt. pages
	Figuring out API, re-doing finnicky code (box model not functioning as expected)
Parker Van Every	Worked on CSS "Golden" template, styling design
	Implement video game API
	Complete HTML and JS code
	Haven't yet settled on API, weather, video game
Ryan Buchanan	Completed draft (including wireframe, content, navigation, pages and assets) of initial cat website
https://github.com/RyanLBuchanan	Implement API code for cat breeds
	Revise and complete website draft for submission as Project 0
	Implementing API code for cat breeds

Samuel Kuhn	I made my first API call to the periodic table API
https://github.com/skuhn002	Today I am going to develop the structure for my HTML pages based off of my wireframing
	None that I can see at this point
Taylor Billingsley	Working on API, shows daily NASA photos, pulling an API key Used different API syntax than shared by Ethan
	Implement fully functional APIs and overall website refine
	Need to get the API working with 6 buttons
